

## Building Regulations Part M / Disability Discrimination Act

The Building Regulations Part M, in conjunction with the Disability Discrimination Act 2004, detail the need for surfaces, within the cubicle and washroom environment, to contrast visually within set parameters.

The current legislation requires that the jointing surfaces have a difference of 30 points between their Light Reflectance Value.

Responsibility lies with the customer to select decors that ensure compliance.

**CUBICLES & DOORS  
COMBINED**
